NOTE—Contn. sheet.

(3

Returned, with compliments, to the Financial Secretary to Government.

Fin. Sec. Singh
2 OCT 1920

111:3

2. Detailed instructions as regards the preparation of the Capital and Revenue accounts of Krishnarajasagara and allied works have been issued in G.O. No.7513-62/G.F.245-16-4 dated 10-6-1918.

Hemagiri channel.
Nandagere channel.
Chamaraja Right Bank channel.

3. The impossibility of allocating the revenue derived from the channels above the Reservoir noted in the margin, under the heads shown in paragraph 5 of the Government Order has been intimated to the Revenue Commissioner in this office No.1160 dated 29th August 1919. (Copy attached.)

Till Government Orders are received on this point, I am unable to acquiesce in the Capital and Revenue accounts of these Upper channels being incorporated in the accounts of Krishna-Rajasagara for the following reasons:-

(1) The greater portion of Nandagere and Hemagiri channels consist of old channels on which large capital outlay has been incurred;

(2) The extensions of these channels have been undertaken under specific sanctioned estimates.

(3) The accounts of these projects will have therefore to be maintained as separate works under class III only and similar procedure has to be adopted for the Chamaraja Right Bank channel, which has got its own sanctioned project and outlay. Only if any extension of ~~calculatio~~ cultivation under these canals is proved and can be traced to be due to the

Execution of the Krishnarajasagara Reservoir Project, that revenue alone may be incorporated in the Revenue Accounts of the Reservoir.

Similarly, canals which receive summer supply from the Reservoir, as noted in the margin, have their own capital and revenue accounts now. The same accounts will have to be continued under separate items under class III (c). Only when summer supply is actually delivered into these canals, as it is expected to be from January 1921, then any capital outlay rendered necessary for the improvement of these canals for affording such summer supply and the Revenue derived from such hot weather cultivation may be incorporated into the capital and Revenue accounts of Krishnarajasagara after getting details for these from the Revenue and Public Works Departments.

(1) Virijanadi.
(2) Chickkadevaroy Sagar.
(3) Devaroy.
(4) Bungaradoddi.
(5) Rajaparameswari.
(6) Ramaswami.
(7) Madhevamantri.

The Comptroller's proposal to club together all these works and incorporate the total capital outlay on them and the revenue derived from them with the accounts of Krishnarajasagara proper will tend to inflate the capital and dilute the revenue returns under the present conditions of the Reservoir works without any organic connection between the component works, when only the electric portions of the project is properly exploited and the irrigation portion is still in its infancy. The accounts should, for the

present

present at any rate, be confined to the Reservoir and the two Low Level Canals ~~at present~~ drawn from it.

K. Srinivasa Rao

Joint Secretary to Government,

Public Works Department.

Bangalore,
29th September 1920

Letter No. 1160 dated the 27th August 1919, from the Chief Engineer, Cauvery Valley Irrigation, Bangalore, to the Revenue Commissioner in Mysore, Bangalore.

++++++

I have the honor to invite your kind reference to my letter No. C.269 dated the 20th May 1919, on the subject of the allocation of revenue derived from lands under canals above the Krishnarajasagara Reservoir, and to enquire whether you have furnished your views in the matter to Government.

2. As stated in my letter it is not practicable to determine the elements on which the distribution has been ordered to be based in paragraph 5 of G.O. No. Fl.7513-62/G.F.245-16-4 dated 10th June 1918.

3. The portion of the river supply that will be released when the Reservoir is completed to 118 feet above bed and that may be considered as made available for extensions above the Reservoir, is represented by a quantity sufficient for 10,200 acres, so that all revenue from the new extensions till the expansion of cultivation reaches that figure may be credited to the Revenue accounts of K.R.Sagara Reservoir and all revenue derived from lands over and above 10,200 acres may be attributed to the natural flow in the river and credited to the revenue accounts of the Upper channels. Of course, all the revenue from lands under the old lengths together with any increase due to the improvements effected in them will go to the credit of the canals.

4. An early decision in the matter is called for and I shall esteem it a favour if you will kindly move on the matter early.

(7

Letter No.C.269 dated the 20th May 1919, from the Chief Engineer, Cauvery Valley Irrigation, Camp, Krishnarajasagara Works, to the Chief Engineer of Mysore, P.W.Department, Bangalore.

+++++++

With reference to your Memo No.M.6338/E.2 dated the 12th May 1919, requesting to convey my views in the matter of the allocation of the revenue from the canals above the Krishnaraja-Sagara Reservoir, I have the honor to state as follows:-

1. There seems to be some ambiguity in the orders contained in the G.O. No.Fl. 7513-62 G.F. 245-16-4 of the 10th June 1918.

2. Para 2 (iii) states that separate Capital and Revenue Accounts should be maintained for each of the Canals above the Reservoir. This implies that such accounts should embody the revenue derived from (a) The old lengths of these channels (b) the recent extensions as well. But the allocation of revenue ordered in paragraph 5 would restrict the maintenance of these accounts to only the recent extensions of these canals, for, there should be no distinction of classes of land indicated under (a), (b) and (c) under the old length of these canals. The Deputy Commissioner apparently has understood the orders in this sense and prepared his statement accordingly.

3 Then, as regards the statement itself, it is not explained how the Deputy Commissioner could distribute the revenue from the extensions above the Reservoir into the three classes noted in paragraph 5, as these classes seem to overlap each other. For instance, lands cultivated in lieu of submerged area might be so cultivated either with the so-called natural flow in the river or under the extensions of these channels with increased supply. Moreover, when the supply in these canals is to be run for serving the old lands as well as new, it is impossible to find out which is the natural flow and which, the increased supply. Both are inextricably blended and no fixed natural supply has been allotted to these channels either during the monsoon or summer

months. It is therefore not possible to find out revenue chargeable to this item.

4 All that is possible is only the allocation under two classes (a) Revenue from Land under the old canals (b) Revenue from lands under the extensions and as these latter have been rendered possible in part owing to the supply set free from the lands coming under submersion in the bed of the Reservoir, the equivalent extension thus rendered possible may be divided in the ratio of the total extent of lands commanded by each of the extensions of the three channels or in the proportion of the capital cost of these extensions.

5 The revenue derived from these extensions till the extent of cultivated land reaches the extent fixed by the above proportionate distribution may be charged to the Krishnarajasagara Reservoir and all further accretions of Revenue may be credited to the Revenue Accounts of these extensions themselves. This is the only equitable allocation possible under the circumstances. It is not practicable to distribute it under classes noted in paragraph 5 of the G.O. referred to above.

3. The enclosures are herewith returned.

Serial No.

Subd with reference to Fd Secy's
Note of 20. 9. 20.

mnd
21/10/20

13/10/20 Fd: Secy)

~~Please note~~
Please note on the proposal
in the light of what is stated by
the Jt Secy P.W.D. mnd 15/10/20

Upon the Jt Secy P.W.D is under
a misapprehension in thinking that
the inclusion of the capital and the
accounts of the canals above the
Reservoir, or of those lower canals which
receive summer supply from the Reservoir
in the group II (a) will result
in their accounts being incorporated
in the accts of K Sapara —

2) In the order of 10. 6. 1918, it
is distinctly stated that separate
Capital and rev accts for
each of the 10 Canals above referred to
~~this~~ have to be maintained as
distinct from the Cash & Rev accts
of the K. Sapara —

It is further laid down that

NOTE—Contn. sheet.

Serial No.

while the cap over areas of the Kharif & the 2 lower & higher level canals for which separate details in the Division referred to in para 1718 of the Bom. D. Code Vol II, the accounts of the other works shall be in simpler forms like those prescribed for works included in Imperial - II C. other minor Irrigation Works.

3) It is only when the connection between these latter & canals with the Reservoir, that - the pumping has been arranged, and thus in entering the names of these works in the appendix to F. & G.O. of 5. 8. 1918, under II (C) also is apparently an oversight -

4) There need be no objection however to show them under II (C) only as agreed by the Bom. Govt pending the allocation of the revenue ~~from~~ ~~attributable~~ derived from them between the Kharif & the K. Rabi in accordance with the rules of Govt -

5) It is expected that revenue from will be obtained into the old canals below the Reservoir from June 1921, and there will be thereafter the same revenue

NOTE—Contn. sheet.

Serial No.

derived from them - which would be creditable to the Reservoir account. ~~However~~ when sufficient ~~of~~ data will be available to prove that the returns of cultivation under the 3 Canals above the reservoir is due to the later, so as to justify any portion of the revenue derived from them being transferred to the account of the project - it for the Administration ~~of~~ of Civil Division. ~~Secretariat~~

6) Orig The irrigation of the 10 Canals above referred to and their connection with the reservoir, it has been ordered that a monthly ~~and~~ account ~~of~~ of the cash revenue of these works - in Civil Deputy - Sholapur - should be kept by the Collector - which is necessary for other irrigation works - proposed under II (C) vide ante for the class -

This arrangement may be communicated to the Divisional Officer Sholapur & the Collector

U

The inclusion of the same works twice in the Appendix to the G.O. of 5th August 1918, once under Clause II A. and again under Clause II C. is an error and they have to be omitted from under either of these two clauses.

The Comptroller proposes that they may be omitted under Cluase II C. and the Chief Engineer, Cauvery Valley Irrigation, considers that they should be kept under Clause II C and eliminated under Clause II A. The Chief Engineer thinks that the inclusion of these works under Clause II A. adversely affects the Capital and Revenue accounts of the Krishnaraja-sagara Reservoir. This is not so. The accounts -- prescribed for the Reservoir and the two new low --- level canals fed by it and ~~those for~~ the other canals below and above it are altogether separate. The canals above and below the Reservoir have been brought under the broad heading "K.R.S. and allied works", as the supply of these canals is increased by the Reservoir. This is the only reason for the classification adopted. In these circumstances, the Comptroller's proposal may be accepted and the repeating works eliminated under Clause IIC.

The question ~~is~~ as to how the revenue from the three canals above the Reservoir should be divided between them and the Reservoir account itself is a separate matter which as reported by ~~him~~ the chief Engineer is under correspondence between the Public Works and Revenue Departments.

P.A. note.
K.J.
8/12/20

In his letter No.58 WAD. dated 3rd August 1920, to the Financial Secretary, the Comptroller requested that the names of the marginally noted channels above and below the Krishnarajasagara may be omitted in class II (c) Other irrigation works and retained under II (A) Krishnarajasagara and allied works as they had been erroneously included under both these items in the Appendix accompanying G.O. No.Fl.746-95/G.F. 232-17-1 dated 8th August 1918.

Above the Reservoir.

1. Homagiri Anicut.
2. Mandagiri Channel.
3. Chamaraja Anicut and channels.

Below the Reservoir.

1. Rajaparameswari channel.
2. Ramaswami Channels.
3. Chickdevaroysagar channel.
4. Devaroy Anicut and channels.
5. Virjanadi channels.

2. It was suggested by the Financial Secretariat that this may be done and it was further stated "these works which were previously classed under other irrigation works - now form part of the Krishnarajasagara and even the outlay previously incurred on these old channels will be taken into the Capital account of Krishnaraja sagara Works".

3. The remarks in my first note dated 29th August September 1920, have been penned in the light of the above opinion and there is no misapprehension whatever. The inclusion of the

NOTE—Contn. sheet.

G. R. S. III-2]

General and Revenue Secretariat. | C A File No. 1 of 1920.

Serial No.

total outlay on these channels in the Reservoir Capital and Revenue accounts would certainly inflate capital and dilute the revenue on the Reservoir and the two low level Canals drawn from it.

4. In Note dated 24th November 1920, the Financial Secretary opines that the inclusion of the same works twice in the Appendix referred to above is an error and that it may be omitted under class II (c). He now states that accounts for the Reservoir and the two new Low Level Canals will be separate from those for the channels above and below. The reason assigned for bringing the canals above and below under the main head Krishnarajasaga and allied works is stated to be that the supply in them is increased by the Reservoir. Only a portion of revenue due to the additional supply has to be credited to the Reservoir revenue account. The capital outlay on these canals has of course to be shown in the separate accounts for these channels (vide paras 4 & of G.O. dated 10th June 1918).

5. Under the explanation now furnished the Financial Department I agree to the

NOTE—Contn. sheet.

G. R. S. III-2]

General and Revenue Secretariat. | C R File No. 1 of 1920

Serial No.

channels being omitted under II (c) and shown under II (A).

6. I have to mention that Holsal channel which is another name for the Madhavamantri channel already included under II (A) may be omitted under II (c) and Chamaraja Left Bank Channel retained under II (c) in place of Chamaraja Anicut and channels as it is only the Chamaraja Right Bank Channel that has to be classed under II (A).

7. The allocation of revenue of the three channels above the Reservoir between the channels and the Reservoir is an important one. The Financial Department may kindly arrange for its early disposal obtaining the file from the Revenue Department.

FROM

T. Satyaraj Chetty, Esq., B.A.,
~~M. N. KRISHNA RAO, ESQ., B.A.,~~
Offg. Comptroller to the Government of His Highness the Maharaja of Mysore.

To

M. N. Krishna Rao, Esq., B.A.,
Secretary to the Government of Mysore,
Financial *Department.*

SIR,

Adverting to Government Order No.Fl.742-95/C.F.202-17-1 dated 5th August 1918 conveying instructions for the systematic compilation of the Capital and Revenue Accounts of all productive works in the State, I have the honor to state that the names of the following Channels appear once under class II (a) Krishnaraja Sagara works and again under class II (c) "other Irrigation Works" -Vide List enclosed. Their inclusion in class II (c) other Irrigation works seem unnecessary as they are correctly shown in class II (a) Krishnaraja of which project these form a part.

It is therefore requested that the names of these channels may be caused to be omitted in class II (c) "other Irrigation Works."

I have the honor to be,
Sir,
Your most obedient servant,

T. Satyaraj Chetty
Comptroller.
